

Supervisor 101

Equipping Supervisors with Practical
Safety Tools for the Field

Coming Soon

safeworx
Consulting Inc.

At Safeworx, we're developing something new and essential for supervisors on the frontline of safety.

Supervisor 101 is an upcoming program designed to provide supervisors with the practical tools and foundational knowledge they need to manage safety effectively in real-world environments.

This program will focus on actionable skills, helping supervisors confidently handle core safety responsibilities like hazard identification, incident management, and emergency response planning.

What to Expect:

Supervisor 101 will deliver:

- ✓ **Essential Safety Knowledge:** From understanding legal responsibilities under Occupational Health and Safety (OHS) Acts to managing hazard cycles and injury classifications.
- ✓ **Practical Tools for Daily Use:** Including job safety analysis, toolbox talks, and action item management.
- ✓ **Human-Centered Insights:** An introduction to human factors and their role in safe workplace practices.

Designed with flexibility in mind, this modular program ensures that supervisors can immediately apply what they learn, driving real safety improvements in their teams and workplaces.

How It Fits in the Safeworx Ecosystem

Supervisor 101 is part of our integrated approach to workplace safety and leadership. While it focuses on foundational safety tools, it complements other Safeworx offerings, such as:

- ✓ **Fair and Just Culture Training:** Embedding principles of trust and accountability into all levels of the organization.
- ✓ **Supervisor Safety Accelerator:** Elevating experienced supervisors into influential leaders who drive safety and team performance.

Together, these programs create a seamless development journey for supervisors, helping organizations build stronger, safer, and more effective teams.
